# PROJECTS

## AI Chatbot Hub

Developed a versatile AI assistant using Python and Google's Gemini Flash model. The application features a Streamlit frontend and is capable of analyzing various file formats (PDF, DOCX, images) to provide contextual insights and a seamless conversational experience.

## Movie Recommendation App

Engineered a content-based movie recommendation system using Python and Streamlit. The application leverages cosine similarity and the OMDb API to suggest movies based on user selections, implemented with Pandas and Scikit-learn.
